

Tamper TX Button Head Self Tapping Screws

We can supply a wide range of tamper TX button head self-tapping screws, with a selection of diameters and lengths.

A type of screw which cuts its own thread into a pre-drilled surface (sheet metal or plastic, for example) and gives grip, therefore not requiring to be tightened from the other end. Ideal where only one side can be accessed. Generally used to attach a component to a surface.

- Button head design.
- TX drive.
- The pin hex head makes these a form of security screw.
